Lion Profile. The Lion (Panthera leo) is the second largest cat in the world, following the Tiger. It is a species in the cat family 'Felidae', which includes Tigers, Leopards and Jaguars. They inhabit the grasslands and savannahs in Sub-Saharan Africa, and there is a critically endangered population in a small section of India.

Lions: The Uniquely Social 'King of the Jungle' | Live Science

The lion (Panthera leo) is a large cat of the genus Panthera native to Africa and India. It has a muscular, deep-chested body, short, rounded head, round ears, and a hairy tuft at the end of its tail. It is sexually dimorphic; adult male lions are larger than females and have a prominent mane. It is a social species, forming groups called prides. A lion's pride consists of a few adult males.
